

## **FOR IMMEDIATE RELEASE**

October 13, 2011

### **Letterle & Associates, LLC Merges with Chambers Environmental Group, Inc.**

PITTSBURGH, PENNSYLVANIA - Letterle & Associates, with a main office in Allison Park, has successfully closed on the purchase of the operations and assets of Chambers Environmental Group, Inc. from Bellefonte, PA. On October 1, 2011 Letterle opened a new office at 629 East Rolling Ridge Drive in Bellefonte at the former Chambers location.

According to Lou Letterle, founder and CEO of Letterle & Associates, “the merger of Chambers into Letterle creates one of the premier environmental consulting and remediation firms in all of Pennsylvania and bordering states. The combined entities allow for a broader and deeper range of environmental services while maintaining Letterle’s historic focus on petroleum remediation projects.”

Lou went on to say that “combining the two companies was easy due to the striking similarities between their cultures, projects, clients and employees. With the merger, Letterle has grown beyond its Western Pennsylvania roots into central and eastern pennsylvania.”

Letterle & Associates, founded in 1998, is an environmental consulting firm with Pennsylvania offices in Allison Park, Franklin and Bellefonte. Letterle specializes in the investigation and remediation of petroleum releases typically at retail gas stations but also provides broader environmental services including regulatory compliance, real estate transfers, permitting, and spill prevention plans.
